Valentine's Fortune Finder

Make a Valetine's Day Fortune Finder to answer any YES or NO question!
Cut it out along the dotted lines and follow the instructions to build the magic fortune finder.

1. Then have an adult cut along dotted line where indicated. Color any areas you choose before folding.

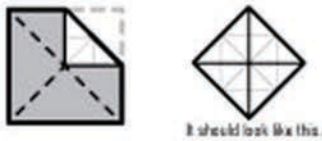
2. Now you have a square piece of paper! With the printed side down, fold the paper on one of the diagonal lines, then unfold it.

It should look like this.

3. Fold it on the other diagonal, and unfold it.

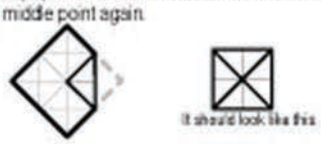
It should look like this.

4. With the printed side of the paper still placed down, fold the corners in to the middle point.



It should look like this.

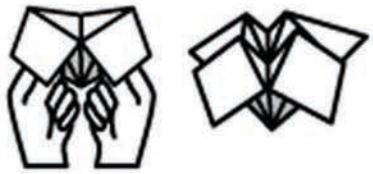
5. Turn the paper over. Now fold each of the corners to the middle point again.



It should look like this.

6. Fold this square in half.

7. Slip your fingers under the flaps and push out the flaps until it looks like the picture below.



8. To play: Have someone ask a yes/no question. With the fortune finder closed, have that person pick one of the four numbers. Open and shut the fortune finder in alternating directions that number of times. Now, four symbols will be visible in the middle of the fortune finder. Ask your friend to choose one of them and open and shut the fortune finder for the number of letters in the word (for example, HEART=5). After this step, ask your friend to choose one of the symbols that shows, open that flap, and read the answer to their question!
